Why take action?

Through the 2015 Paris Agreement, world governments committed to curbing global temperature rise to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C. In 2018, the Intergovernmental Panel on Climate Change warned that global warming must not exceed 1.5°C to avoid the catastrophic impacts of climate change.

To achieve this, GHG emissions must halve by 2030 – and drop to net-zero by 2050. We have limited time for action and the private sector has a crucial role to play – every sector in every market must transform. Companies with science-based targets are already [cutting emissions at scale](#); all businesses must now join them.
